

An AI-powered healthcare assistant built with **React, TypeScript, Express, Prisma, and PostgreSQL**. CareGuru+ helps users perform preliminary symptom assessments through an intelligent conversational interface while following safe medical guidance practices.

Features

- 🗣️ AI-powered health conversations
 - 🩺 Symptom assessment workflow
 - 🚑 Emergency symptom detection
 - 📋 Structured diagnosis cards
 - 💡 Action recommendations
 - 💬 Conversation history
 - 📱 Modern responsive UI
 - 🔒 Clean Architecture backend
 - 🗄️ PostgreSQL + Prisma integration
-

Tech Stack

Frontend

- React 19
- TypeScript
- Vite
- Tailwind CSS
- Axios
- Framer Motion
- Lucide React

Backend

- Node.js
 - Express
 - TypeScript
 - Prisma ORM
 - PostgreSQL
 - Zod
 - JWT
 - Bcrypt
-

Architecture

```
graph TD; A[React Frontend] --> B[Express REST API]; B --> C[Conversation Engine]; C --> D[AI Layer]; D --> E[Prisma ORM]; E --> F[PostgreSQL];
```

Project Structure

```
frontend/  
src/  
prisma/
```

Installation

Backend

```
npm install  
npm run dev
```

Frontend

```
cd frontend  
npm install  
npm run dev
```

Future Improvements

- User Authentication
 - Persistent Chat History
 - Claude API Integration
 - Infermedica API Integration
 - Medical Report Export
 - Appointment Booking
 - Deployment on Vercel & Render
